Teton Chooses KVH TracVision R4 Satellite TV System to Bring Entertainment to Customers

June 26, 2006

MIDDLETOWN, R.I.--(BUSINESS WIRE)--June 26, 2006--

2007 Model Year Teton 5th Wheel Campers to Offer Stationary Automatic TracVision R4 for All-digital Satellite TV Programming

The luxury fifth wheel recreational vehicles built by leading travel trailer manufacturer Teton Homes serve as a home away from home for thousands of travelers around the country. These luxurious vehicles have something else in common with a well-equipped home - live, digital satellite TV. Teton Homes will be including the stationary automatic TracVision(R) R4 satellite TV antenna from KVH Industries, Inc. (Nasdaq: KVHI) as an option on Teton's 2007 model year travel trailers, making this the third consecutive year that Teton has offered one of KVH's award-winning satellite TV systems.

"KVH's TracVision is easy to install and virtually trouble-free," explained Marion Johnson, Teton's director of engineering. "The systems are competitively priced and have been very dependable for our customers."

Commenting on Teton's selection of the TracVision R4, Ian Palmer, KVH's executive vice president of satellite sales, said, "When we set out to develop the TracVision R-series, we wanted to be certain that we were offering RV owners and manufacturers the most advanced technology available at the most competitive prices. It is very gratifying that Teton recognizes the benefits our TracVision systems offer their customers by way of unmatched reliability, support for digital satellite TV, HDTV compatibility, and the most extensive customer support program available in North America."

The TracVision R4 satellite TV system allows RV owners to enjoy satellite TV and music entertainment virtually anywhere they travel in the United States and Canada. All they need to do is pull into the campground or parking space, settle in for the night, and turn on the TracVision R4. The fully automatic antenna, protected under its stylish dome, seeks out the correct satellite automatically thanks to its integrated Digital Video Broadcast (DVB(R)) technology. Passengers can enjoy watching their favorite programming or listening to a variety of satellite radio music channels available on DIRECTV(R), DISH Network(TM) or ExpressVu. The TracVision R4 is also fully compatible with the HDTV programming offered by DISH Network as well as on DIRECTV's standard 101 degrees W and 119 degrees W satellites.

About Teton Homes

Wyoming-based Teton Homes (www.tetonhomes.com) was founded in 1967 and has since become one of the world's top manufacturers of luxury fifth wheels and the number one choice of America's full-time RVers.

About KVH Industries, Inc.

Middletown, RI-based KVH Industries, Inc., is a leading provider of in-motion satellite TV and communication systems, having designed, manufactured, and sold more than 100,000 mobile satellite antennas for applications on boats, RVs, trucks, buses, and automobiles. Winner of the prestigious General Motors Innovative Design Award, CES Innovation Award, 21 National Marine Electronics Association "Best Product" awards, and a finalist for the Automotive News PACE Award, KVH's mission is to connect mobile customers with the same digital television entertainment, communications, and Internet services that they enjoy in their home and offices.

This release may contain certain forward-looking statements that involve risks and uncertainties. Forward-looking statements include, for example, the functionality, characteristics, quality and performance of KVH's products and technology; and customer preferences, requirements and expectations. The actual results could differ materially. Factors that may cause such differences include, among others, changes in satellite TV services offered by third parties as well as those discussed in KVH's most recent Form 10-Q filed with the SEC. KVH assumes no obligation to update its forward-looking statements to reflect new information or developments.
